

## The 1968 Fritz London Memorial Prize Winner

William M. Fairbank (Stanford University, USA)

<http://www.phy.duke.edu/william-m-fairbank>

Citation:

“For his very precise measurement of the specific heat of  $^4\text{He}$  at the lambda point, of the nuclear susceptibility of liquid  $^3\text{He}$ , the discovery of the phase separation in  $^3\text{He}$ - $^4\text{He}$  mixtures and of the flux quantization in superconductors.”
