

The 1987 Fritz London Memorial Prize Winners

Jun Kondo (Electrotechnical Laboratory, Tanashi, Tokyo, Japan)

http://en.wikipedia.org/wiki/Jun_Kondo

Citation:

“For his explanation of the phenomenon of the resistance minimum in metallic systems with magnetic impurities, revealing a subtlety in the behavior of interacting Fermi systems not suspected previously. Studies inspired by this work have led to major advances in theoretical techniques and to an improved understanding of a wide variety of interacting systems.”
