

The 1981 Fritz London Memorial Prize Winners

Anthony J. Leggett (University of Illinois, USA)

<http://physics.illinois.edu/people/profile.asp?aleggett>

Citation:

“In recognition of his outstanding theoretical contributions to our fundamental understanding of normal and superfluid Fermi liquids. His theory of magnetic resonance in the superfluid phases of ^3He provided the key to deciphering their mysteries and an invaluable guide in their subsequent exploration.”
