

The 1981 Fritz London Memorial Prize Winners

Isadore Rudnick (University of California, Los Angeles, USA)
<http://senate.universityofcalifornia.edu/inmemoriam/isadorerudnick.html>

Citation:

“In recognition of his outstanding experimental contributions to our fundamental knowledge in bulk liquid helium and in helium films by means of a wide range of highly sophisticated acoustic techniques that were particularly important for understanding the superfluid phase transition of ^4He in two and three dimensions, the superfluid critical velocities and the persistent currents.”
