

The 1975 Fritz London Memorial Prize Winner

John Wheatley (University of California, San Diego, USA)

[http://en.wikipedia.org/wiki/John_Wheatley_\(physicist\)](http://en.wikipedia.org/wiki/John_Wheatley_(physicist))

Citation:

“In recognition of his many achievements in advancing the physics of millikelvin temperatures, including his development of improved dilution and Pomeranchuk refrigerators, as well as his fundamental research elucidating the Fermi Liquid properties of liquid ^3He , the properties of ^3He - ^4He mixtures, and the recently discovered superfluid phases of ^3He .”
